

How to get connected to your free PSU web server

FTPing While On Campus

You'll need FTP client software. Cyberduck is an easy choice. It's free and relatively straightforward.

<https://cyberduck.io>

On the cyberduck homepage,
Click on these
buttons, NOT the
apple/windows store
buttons, they will
want money, the
white buttons won't
ask for money.

We like free.

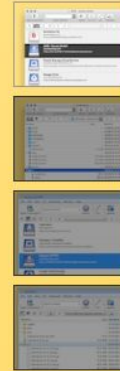

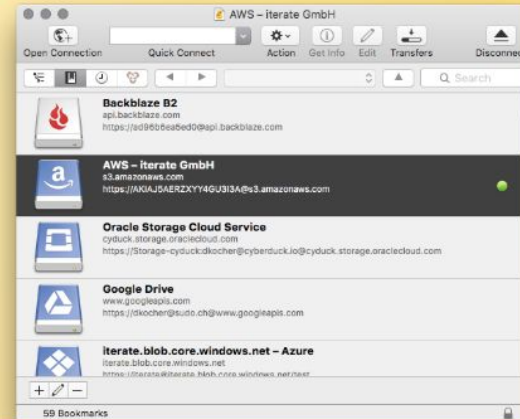

Cyberduck is a libre server and cloud storage browser for Mac and Windows with support for **FTP, SFTP, WebDAV, Amazon S3, OpenStack Swift, Backblaze B2, Microsoft Azure & OneDrive, Google Drive and Dropbox.**

Download
Cyberduck for Windows.

~~Get it on
Windows 10~~

Download
Cyberduck for Mac.

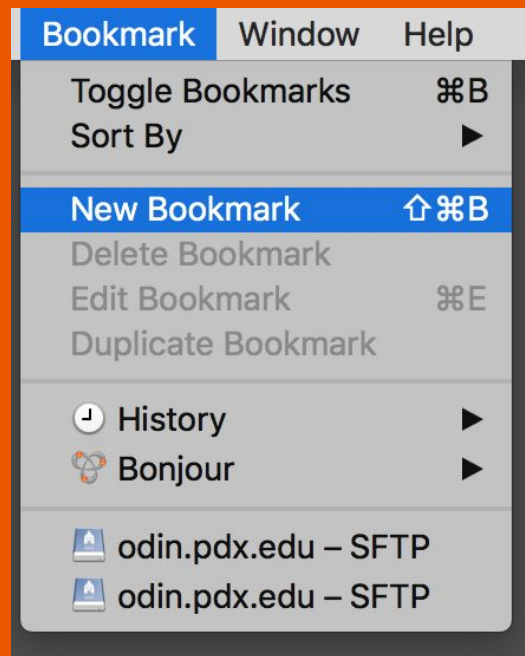

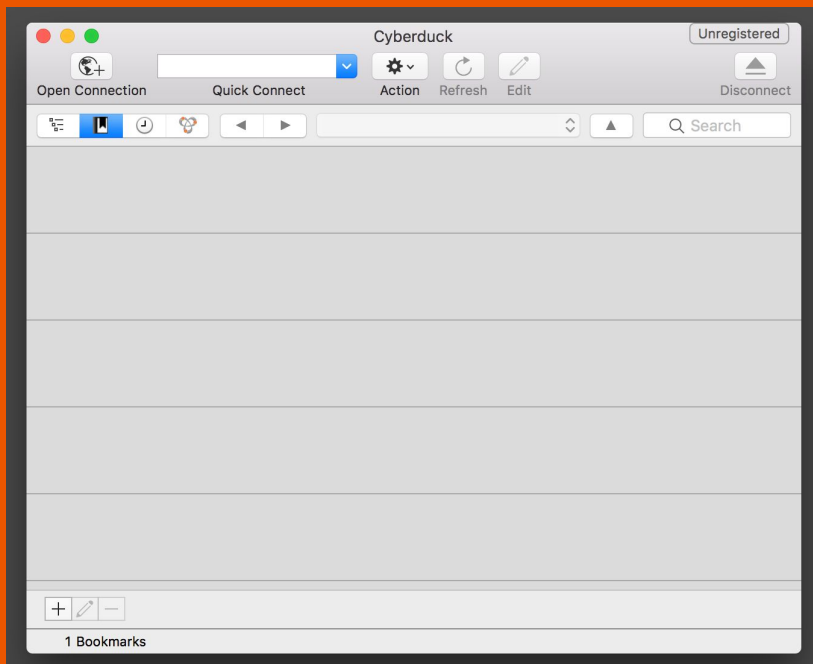

~~Download on the
Mac App Store~~

Once you launch the cyberduck app....

You will first be greeted with this lonely screen. Let's add a bookmark so we don't have to remember this stuff...

Choose Bookmark > New Bookmark

Create a bookmark in Cyberduck with the following:

Do these steps:

Choose SFTP (SSH File Transfer Protocol)

Server: odin.pdx.edu

Username: You odin username

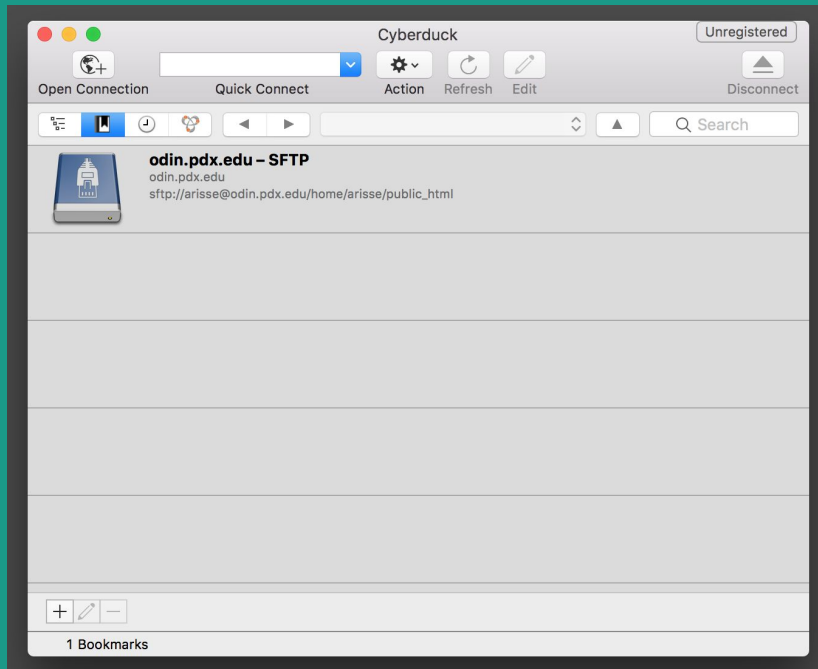

Leave the rest. The nickname will populate automatically. Port 22 is the default port.

The screenshot shows the 'odin.pdx.edu – SFTP' window in Cyberduck. The protocol is set to 'SFTP (SSH File Transfer Protocol)'. The nickname is 'odin.pdx.edu – SFTP'. The URL is 'sftp://odin.pdx.edu'. The server is 'odin.pdx.edu' and the port is '22'. The username is 'jstudent'. The 'Anonymous Login' checkbox is unchecked. The SSH Private Key is set to 'None' and the Client Certificate is also set to 'None'. A 'More Options' button is visible at the bottom left.

odin.pdx.edu – SFTP	
SFTP (SSH File Transfer Protocol)	
Nickname:	odin.pdx.edu – SFTP
URL:	sftp://odin.pdx.edu
Server:	odin.pdx.edu
Port:	22
Username:	jstudent
<input type="checkbox"/> Anonymous Login	
SSH Private Key:	None
Client Certificate:	None
► More Options	

Cyberduck cont...

Now your screen's not lonely! Double click to connect.

Go to your site in the browser:
`http://web.pdx.edu/~username`

FTPing While Off Campus

You'll need to get the Duo Mobile app for your smart phone.

PSU's instructions:

<https://www.pdx.edu/oit/enroll-duo>

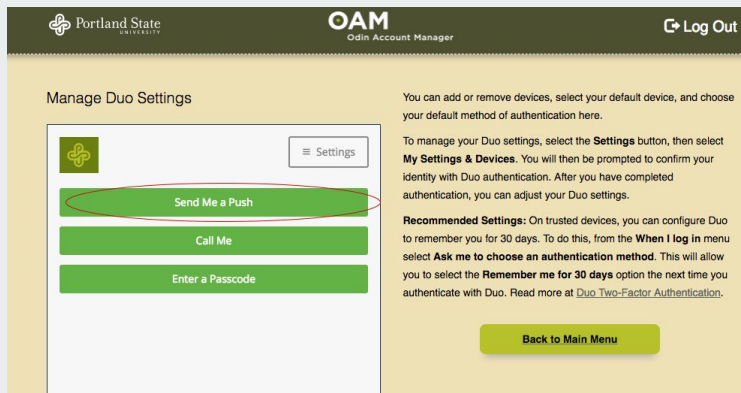

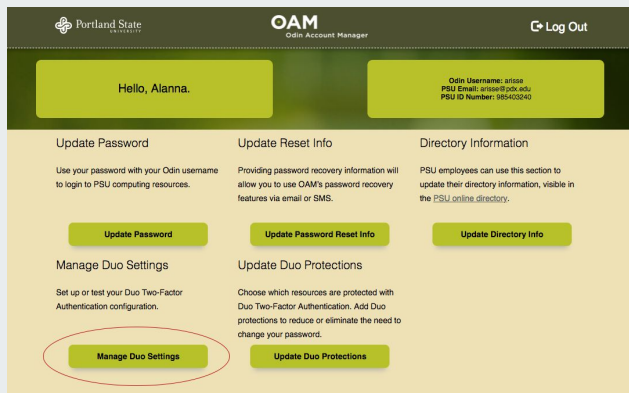

You'll also need to get the Cisco AnyConnect Mobility Client for your laptop.

PSU's instructions:

<https://www.pdx.edu/oit/virtual-private-network-vpn>

How do you know if Duo Mobile is working?

1. Go to oam.pdx.edu and click the Manage Duo Settings Button

2. Click on Send me a push

If you don't see Duo Mobile related buttons on this page you haven't gotten it installed yet. Go back to the previous slide and install it. If you have problems, email help@pdx.edu

Once you have Cisco
AnyConnect connecting, you
cyberduck just as you would
on campus.
